

Application Serial No. 10/573,229 ----- 3
(National Stage of PCT/EP04/10697)

REMARKS

A replacement paper copy of the Sequence Listing is submitted in this application, along with a Computer Readable Form (CRF) of the Sequence Listing, and Verification Statement, as requested in the Notice to Comply (371 Formalities Letter) dated January 17, 2008.

The specification has been amended to enter the replacement sequence listing.

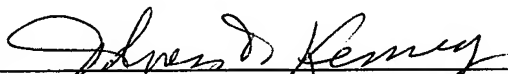

No new matter is added by this amendment.

Applicants note that the Notice indicates that a Statement verifying that the content of the CRF of the sequence listing is identical to the paper copy and includes no new matter has not been filed. That is incorrect. The PAIR Image File Wrapper record for this application includes a scan of the required Statement filed by Applicants on January 16, 2007, when the most recent prior version of the Sequence Listing (paper and CRF) was filed.

An early action on the merits is solicited.

Respectfully submitted,

Dated: February 8, 2008
